

Including All Children!

Management of Children with Special Health Needs in Child Care

TRAINING DESCRIPTION:

What are the most important things you need to know to provide safe and appropriate care for each individual child with special health needs? This training will first address attitudes on inclusion, and later discuss other barriers and benefits of inclusion. We will provide a brief overview on the laws that support inclusion, and discuss the team work needed to make inclusion possible. We will navigate the general components of an individual care plan and discuss implementation. Do you have the knowledge and skills to safely care for the child? Do you know the symptoms of concern, and the emergency response plan for each child with special needs? Learn how to safely include a child with special health needs in your care. It may seem challenging, but if you learn these fundamentals of safe inclusion, it can be rewarding for all!
